

barcontrol

THE WATCH MAN

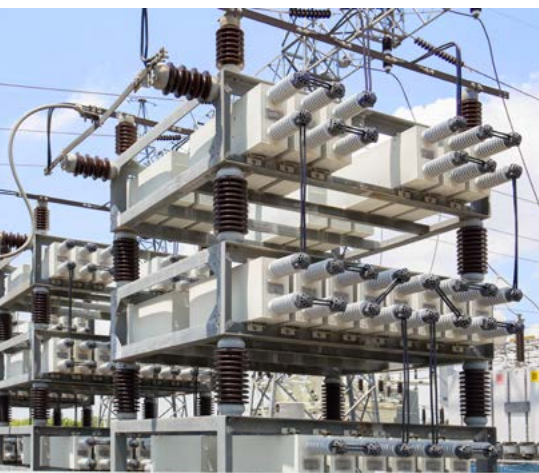

ON ALERT, NO EXEPTION

YOUR NEEDS

You build the most robust power capacitors for energy plants, substations and other electrical facilities? You need to guarantee continuous service, even under extremely rough conditions?

Reliable pressure monitoring is vital to achieving that goal. With consistent performance over decades, under extreme temperatures, in high humidity, salty air or other harsh conditions.

OUR SOLUTION

The CDL, a tough switch, designed from the ground up for the most extreme applications. Featuring:

- A stainless steel diaphragm that shows no aging
- Switching system with self cleaning contacts and gold plated surface
- High corrosion resistance of all used materials
- Constant, small contact resistance

suitable for
railed vehicles

designed for
extreme longevity

operation in rough envi-
ronmental conditions

UNDER PRESSURE

WE WORK BEST
